

## ORCID and Pure – Linking an existing ID or signing up for the first time

An ORCID (Open Researcher and Contributor ID) is a persistent digital identifier for researchers, used to distinguish one researcher from another and uniquely identify them in relation to their Research outputs. Pure has the functionality to send details of your research outputs directly into your ORCID linked account

### Logging in

Go to [pure.soton.ac.uk](http://pure.soton.ac.uk) – if you are signed into the University system it will automatically open for you

It will open on your personal module – if your permissions grant you access to other modules it will open on the module you were last on.

## Connect with your ORCID ID

You will now be directed to the ORCID site where you can generate your ORCID ID (if you don't already have one) and authenticate it.

Upon authenticating your ORCID ID, you will grant read permissions to Pure. It means Pure will be able to read public and limited visibility items on your ORCID record and search on your behalf.

☐ Pure is allowed to read public and limited visibility items on my ORCID record (Required to proceed).

**Before allowing Pure to export content on your behalf to ORCID, please read the information below carefully.**

You can grant Pure permission to export content to ORCID (write rights) by checking the checkbox below. If you do so, upon setup, Pure will export the following content immediately, and then subsequently automatically update it at a frequency determined by your Pure administrator:

- Institutional organisational affiliation
- Other personal identifiers (e.g. Scopus author ID, Researcher ID)
- Your research outputs, where:
  - the publication status is 'E-pub ahead of print, Published'
  - the visibility of the record is 'Public - No restriction'
  - the workflow step is at least 'Validated'.

This takes you to the ORCID page  
You can sign in to an existing ORCID or  
Register for an ORCID

This guide shows registering for an  
ORCID, if you have an existing ORCID  
you need to add your email and  
Password and follow the steps to  
approve the connection
