

Creative Commons licences

An introduction

Creative Commons provides a suite of [six open licences](#) that provide a simple, standardised way to grant copyright permissions for creative and academic work, ensuring proper attribution and making it clear how others may copy, distribute, and make use of those works.

If you are publishing a journal article, your funder may require a CC BY licence if the article is open access in the journal.

CC BY (Creative Commons Attribution licence)

This license allows re-users to distribute, remix, adapt, and build upon the material in any medium or format, so long as attribution is given to the creator. The license allows for commercial use.

Attribution is given for a journal article by citing it as you normally would. Creative Commons suggest wording for attributing other types of content: <https://creativecommons.org/use-remix/>

Other Creative Commons licences

The other Creative Commons licences are more restrictive, including share-alike (SA), non-commercial (NC) and no derivatives (ND). All the licences are in explained in full at <https://creativecommons.org/about/ccllicenses/>

Does Creative Commons replace copyright?

No, Creative Commons licences are defined as “some rights reserved” and build on copyright by defining which rights the creator of a work retains, and which are waived.

What about third party copyright?

A work may contain content with rights held by a third party. The author may be able to obtain permission to sublicense those rights under their chosen CC licence, or will indicate which content is not covered by the CC licence. Read more: <https://creativecommons.org/share-your-work/licensing-considerations/version4/>

Can Creative Commons licences be used for datasets?

Yes. We recommend that all datasets should have a licence to determine re-use. For datasets with a [University of Southampton DOI](#), we apply a CC BY licence as standard unless the author selects a different licence. Find out more: <https://library.soton.ac.uk/researchdata/licensing>

Copyright and your PhD thesis

University of Southampton students own the copyright of their theses. PhD theses are published in our institutional repository (ePrints Soton) with the [University of Southampton Thesis Licence](#). Find out more: <https://library.soton.ac.uk/thesis/copyright>

For help and advice with any copyright or licencing query please email eprints@soton.ac.uk
